

ServiceNow Asset Management | ServiceNow IT Asset Management | Jade

ServiceNow IT Asset Management automates the end-to-end lifecycle for software licenses, hardware assets, and Cloud One platforms.

ServiceNow IT Asset Management is used to gain core asset management abilities to oversee infrastructure, operations, and field services, and inform inventory, stockroom, and contract decisions.

Benefits of IT Asset Management:

- Asset lifecycle investments are used to improve IT services and make smarter decisions
- Automate asset lifecycle processes to minimize repetitive tasks and wasted resources
- Automatically enforce your asset policies and regulatory requirements to limit overall risks
- Modernize and automate IT
- Connect information and people with process workflows
- Reduce IT costs

Leverage Jade's ServiceNow Asset Management Services to increase visibility and lifecycle automation of software licenses, hardware assets, and cloud resources. Contact ServiceNow Elite Partner - Jade for [ServiceNow IT Asset Management](#) and [ServiceNow Hardware Asset Management](#).
