

My Tree is Covered in Webs: What Do I Do?

Have you ever looked at your tree only to find out that there are stringy webs hanging off of the branches and leaves? This may seem really out of place but no, you are not going crazy. Chances are your tree has been visited by seasonal bugs. In a lot of cases, Eastern tent caterpillars or fall webworms are the reason for these web-covered saplings. To learn about what to do if you want to get rid of these webs, check out our blog post linked below.

If you're in need of quality [Toronto Tree Care Services](#), let our company at **Five Star Tree Services** help. To learn more about our services/our team/how we can help, be sure to visit our official website and call us today!
