Drivers

Growing demand for plastic-based packaging in the e-commerce industry

Increasing demand for plastic-based packaging in the e-commerce industry is expected to drive the market's growth in the forecast period. This is attributed to the high dependency of the e-commerce sector on plastic-based packaging. This material is widely available, low-priced, lightweight, and highly reliable compared to paper, wood, and corrugated board. Moreover, the augmented sales of grocery products with an immediate doorstep delivery strategy spurred the demand for plastic-based packaging. As a result of all these factors, enhance the market growth.

- **Increasing demand for food and beverages through e-commerce platform**

Growing demand for food and beverages through e-commerce platforms will likely surge the demand for appropriate packaging in the e-commerce sector. The demand for groceries through online shopping has augmented on a large scale. The ease of ordering food and beverage products online has augmented the demand for the packaging of these products. The food and Drug Administration have made it mandatory and keeps the assurance whether the food sold is properly labeled and packaged through numerous laws under the Fair Packaging and Labelling Act. Hence, the rising demand for food and beverages through e-commerce platforms is expected to propel market growth.
