

The Pragmatism play to spur new gold rush on Mustang Trail

Pragmatic Play, a leading content provider in the iGaming industry, invites players to respond to calls from the wild in its latest release, Mustang Trail.

The 5x3 Reel Online Slot uses eagles, bison and horses as the highest-paid symbols, inspired by wildlife in the Midwest of the United States. Players can match a combination of these symbols across the title's 10 paylines to create a victory.

Wilde created this victory by replacing all base game symbols to make it easier to form a finish line. If more than three players land, they will be joined by scatchers who can participate in the bonus round. [경마](#)

During the bonus spin, the progression at the top of the reel increases with each additional scattering landing. Grants 5 additional spin retriever every 3 times and awards a randomly placed sticky wild. This combination of re-trigger and wild offers excitement and a heightened chance of a big win throughout the bonus.

The Mustang Trail is a visually stunning slot centered around a progressive mechanism that further diversifies the supplier's vast portfolio. The title follows recent hit games such as Forge of Olympus, Pub Kings, and Piggy Bankers.

"The Mustang Trail boasts a buildable bonus round that offers players an interesting gameplay experience with popular themes," said Irina Cornides, chief operating officer of Pragmatism Play. "With re-triggering and sticky wildness that gives us more spin, we're awash with the winning potential offered to stimulate big rewards."

Fragmatism Play currently produces up to eight slot titles a month, offering live casinos, virtual sports and bingo games as part of a multi - product portfolio available through one single API.
