

# The Best Bluetooth Headphones for every OTT Lover!

There was a time when people's favorite pastime was to book a ticket and head to the nearest theater to watch their favorite stars on the big screen. While movie theaters still exist, OTT platforms have gained quite a popularity among the masses. They offer the convenience of watching your favorite movies and shows from the comfort of your home at any time that you want. You no longer have to look for slots or find the perfect seats. Another thing that has resulted in the popularity of OTT is the variety of content that exists on these platforms. It doesn't matter if you enjoy TV shows or like movies, be it a documentary or a commentary on some historical event, be it a fictional superhero movie or a biography - you are guaranteed to find it all.

You can watch it all and stay entertained, irrespective of time and place.

All you need is a system, a good internet connection and a pair of wireless [headphones](#)! While having a good system like a tablet, smart TV or your laptop will ensure high, bright quality visual - you do need a good pair of bluetooth headphones to ensure that you get to hear everything clearly. They ensure that you get to completely enjoy the dialogues, the background music and all the other audio effects that make your favorite online series an absolute treat. You need headphones with a mic as they can be used later for other things like talking with your friends or having online calls.

And that's why we are here today to help you find some of the [best headphones](#) that you can count on when watching movies or shows online.

### **Immortal 1300**

If you love music and movies - then these [wireless headphones](#) are definitely meant for you. Designed to offer pure bliss, these headphones come loaded with many interesting features that make your viewing experience amazing. They come with breathable, high-quality earmuffs and headband to keep you comfortable during intense watching sessions. The RGB breathing LEDs on the side of the headphones add a little drama to the overall look of the headphones - hence complimenting your style. They not only pump out boAt signature sound that is loud and clear but also supports driverless 3D spatial sound that ensures that you enjoy a highly immersive listening experience. You are guaranteed to not miss the spatial sound effects of theater when watching movies online. They also offer ultra low latency of 35 ms that ensures that your audio and video is always in sync! And if apart from being a movie buff, you enjoy gaming also then these headphones will be even better for you as they are great for gaming. These wireless gaming headphones come with dual microphones. The detachable microphone helps you give clear instructions while fighting a battle online.

### **Immortal 1000D**

Meet another marvel from the boAt universe. These wireless [bluetooth headphones](#) are lightweight but offer a beast-like performance. Once you put them on, you will simply transcend to the world of your favorite movie or show, leaving behind the ambient reality and its annoying sounds. They come equipped with a 50mm driver and deliver 7.1 channel surround sound that is absolutely immersive. Equipped with Dolby Atmos, these headphones will make sure that you don't just watch something but live in it. They also support RGB LEDs on the headset that add to the overall vibe of the headphones. These are great [gaming headphones](#) as well as all the above listed features will make virtual gaming a delightful experience as well.

### **JBL Quantum 100**

Now that you know that you are not going to simply watch one episode and stop after that, you need to be a little extra careful when investing in headphones that don't only sound good but are also comfortable to wear for long durations. These are just those headphones. They are lightweight and the headband supports memory cushioning. The 40mm dynamic drivers deliver JBL QuantumSound Signature that makes everything sound loud and clear. They also support detachable Voice focus Directional Boom mic with mute features for crystal clear communications.

### **Razer Barracuda X**

These headphones are all about comfort and convenience. Weighing around only 250g, these are designed to help you binge watch. The 40mm drivers keep you pumped up and the patented design makes sure to deliver every treble, beat or bass with sheer perfection. They also support easy push control buttons that keep you in charge of your listening. They are a versatile pair of headphones that are not so expensive as well.

### **HP X1000**

This wireless headset will keep you hooked to your screen. They are designed to deliver 7.1 virtual sound that provides great precision and depth. The 50mm driver delivers excellent sound quality that adds value to your online watching experience. You can adjust the flexible boom mic and the controls on the earcups add further convenience to the listening experience. They are also comfortable to use for longer durations as they come with thicker ear pads and a suspension headband.

We hope that you have now decided your favorite companion for the next movie marathon!
