I think we will come to agree that nowadays political systems are not sufficient to go step ahead in the peace promise for global society. I think we need equal rights for all women and men, run business without profit, pay for employees relevant provision for efficiently work, organize the society in the independent selfgoverned local communities, establish international nonprofit free market enterprise POL-CAT joint-stock company for advising and supporting independent local communities, and what else....??? be loving, modest, selfless independent and educated human...??? Its an utopia or can it be in real???
