Among the 30th round of the Proto match, the game against Seoul Samsung-Wonju DB can be enjoyed in four ways: ▲ General (69) ▲ Win 5 (70) ▲ Handicap (71) ▲ Underover (72) and the game will be available until 6:50 p.m. on Thursday, the 7th, 10 minutes before the start of the game.

As of the 7th (Thursday), the dividend rate and the probability of winning the general (69) game announced on the official Internet release site "Betman" were Wonju DB victory (1.07 times/82.2%) and Seoul Samsung victory (4.96 times/17.7%).

Wonju DB victory (1.28 times/68.8%) was also the most likely to win the game, which had to consider the difference between the two teams within five points, followed by close games (3.75 times/23.5%) and Seoul Samsung's victory (9.90 times/8.9%).

The dramatic division of the dividends of the two teams in the target game seems to have had a big impact on the current league rankings and their record of confrontation. Wonju is at the top of the league (35 wins and 10 losses) as of the 7th, while Samsung is sluggish and slumped to the bottom 10th (10 wins and 35 losses).

The two teams met five times in total this season alone, but the outcome of the games all came to a victory for Wonju. The results of their duel in each round were the first round (94-58), the second round (102-73), the third round (91-67), the fourth round (73-87), and the fifth round (73-108).

If betting is burdensome for regular and win-loss games due to objective power differences, it is also a good idea to choose handicaps (71) and underovers (72).

The handicap was given a reference point of +10.5 points to Seoul Samsung. Therefore, in order for Wonju to win in this condition, it has to score more than 11 points over Samsung.

Under overs are a game in which you can select whether the sum of the two teams' total points is higher (over) or lower (under) based on the reference point. As a reference value for underovers, 169.5 points were given.

An official from Sports Toto Korea said, "A variety of proto-winning games for the 2023-24 KBL game are set to be released. In one target game, you can choose only one of normal, win-5, handicap, and under-over, so it is a good idea to combine other games to increase the dividend rate."

Detailed analysis of the game targeting the KBL Seoul Samsung (home) and Wonju DB (away) matches in the 2023-24 season can be found on the official online release site "Betman" Toto Guide page.
