For the devout Christians, studying the Bible is essential to their faith. However, doing this can become difficult, tedious, and time-consuming. The modern age of technology has provided a way for people to get the most out of their Bible study: studying parallel Bibles. Parallel Bibles allow you to read different translations of the Bible simultaneously, so that you can maximize your understanding of scripture.

Jorge Carrasco, a Christian software engineer, has created a ground-breaking new tool for parallel Bible study. His "Parallel Bible Reading" app is an online Bible study app designed to provide the maximum amount of information to those who wish to delve into the scriptures.

Online Bible Reading

The Parallel Bible Reading app allows users to access multiple Bible translations, such as the New American Standard Bible, the King James Version, and the New International Version. With this app, users can read the Bible in its entirety and compare different translations against one another. This provides an in-depth view of how each translation of the Bible has been interpreted. It also allows users to study the language of the original texts, so that they can gain a better understanding of the context of the passages.

The app also features notes and commentary for each book of the Bible. This provides additional resources for those who wish to further their exploration of the Bible. It also allows users to create their own personal notes and annotations as they study.
