

Easily Coordinate And Rectify AEC Design Clashes With BIM Clash Detection - Olympia

What is a design clash?

A clash happens when two design parts need to be spatially coordinated. These clashes are typically challenging to identify and fix during the project's initial drafting phase and, when discovered during the construction phase, can incur a loss of productivity.

Silicon Engineering Consultants LLC is one of the top BIM outsourcing firms in the USA, offering accurate [BIM clash detection services](#). With our quick clash detection services, you can efficiently resolve hard, soft, and workflow clashes expeditiously and affordably.

Three Major Types Of Clashes:

Hard Clashes | Soft Clashes | Workflow Clashes
