

Switch to Your Preferred View of a Game With the Only Interactive Video Software For Basketball

Are you ready to take your basketball watching experience to the next level with interactive video software? SwitchView Video lets you switch to your preferred view of the action with our innovative multi view video Player and Maker! See the action from all angles, from every jump shot to every pass, and get closer to the action than ever before!

SwitchView Video transforms conventional basketball videos into exhilarating multi view experiences. See a basketball example and other sports at <https://switchviewvideo.com>.

Follow your favorite player through the game – view and replay moments, players, scores, etc. from different angles – simulate viewing from multiple locations in the venue.

Use the arrows to switch the view of the action and zoom tool to get into the action.

SwitchView Video is the only video technology that lets video viewers switch to their preferred view of the action during playback! Combining the video effects of 3D video, spatial video, and linked video technologies to deliver a never-before-seen multi view interactive video experience. Record your videos, import them into our online video generator and free video editor, and use our built-in video streaming software to share your multi view online video

anywhere, on any device, and any browser with no additional software – IT'S THAT EASY!
You can also embed the generated interactive video into your web site or social media page.
Unlike a conventional video editor, SwitchView Video Maker is the only video editing software and video generator that empowers you to create video switcher effects for your video viewers, synchronize videos, cut the video, and create other camera switcher effects.
SwitchView Video is distinct from and should not be confused with 360 video, VR video, volumetric video, manycam, viewsync, switcher studio, and other video software and technologies that provide different functionalities.
