While choosing the right countertop, you must consider the cabinets or cupboards in your kitchen to ensure that your new kitchen countertop not only looks great but that it also matches well with the kitchen cabinets. [Kitchen countertop shops in Bhubaneswar](#) offer a wide range of countertops to pick from.

Kitchen countertops made of granite are quite popular among people. They are often purchased as whole blocks and cut down to fit. They are very strong and durable making them a popular choice.

When it comes to price, granite costs are the same as some hardwood kitchen countertops. But it cost less than stainless steel countertops.

Granite countertops can last a lifetime. Besides, they are loved by homeowners since each granite block is an artwork in itself. While engineered stone countertops are artificial and come with pre-set patterns, granite is a natural stone and has unique color and texture.

Kitchen countertop of stainless steel is an outstanding option, but they are very expensive in comparison to the price of countertops of granite and other materials.

This is mostly chosen by chefs whose countertops take a lot of throbbing.

Kitchen countertops made up of wood can add sophistication to your kitchen. They are available in multiple colors and patterns a. These kitchen countertops are made from hardwood such as mahogany, cherry, teak, oak, walnut, pecan, hard maple, and many others which ensures high durability. The disadvantage to wood countertops is that they need to be polished with oil periodically to give them that shine.

One of the latest countertop materials to be found in [kitchen countertop shops in Bhubaneswar](#) is glass countertops. It involves the use of thick tempered glass with many designs and textures to select from. They are non-porous and require little maintenance. These are the best for modern kitchens, and their textures can mask small scratches and fingerprints.
