You may occasionally look outside your backyard window and be dissatisfied with your limited space. Or you may simply wish your landscape design was more stylish or accommodating for hosting. Pergolas are the answer! They make being in your backyard as pleasant as being in your own cozy home. It is your love of the outdoors, your meticulous attention to your [home's](#)

[landscape](#), and your innate desire to create beauty and a welcoming, irresistible outdoor sanctuary for your family and friends.

Pergola = All-Purpose Functionality + Easy Installation + Adding Beautification

Let's see how:

All-Purpose Functionality

Are you unsure whether a pergola would be a good addition to your backyard? Pergolas are beautiful as they are both functional and aesthetically pleasing, adding reasons to incorporate them into your space.

- **Create a Versatile Shade**

An aluminum pergola with a roof is best for providing shade from the sun's harsh, direct rays while still allowing sunlight to enter the space. Although outdoor aluminum pergolas do not offer complete shade as a standalone structure, their versatile structures allow for various shade options, such as a retractable canopy. This option will enable you to enjoy varying degrees of shade depending on the time of day or the sun's location.

- **Add Value to Your Home**

Is a covered wooden pergola really worth the investment? Yes, the shade, beauty, and accommodating nature of a pergola are intended to increase the market value of your home. According to experts, your home's landscape can potentially increase your property's value by 15%. Pergolas are installed as either the final missing piece that completes your backyard landscape or to inspire you to be more creative with your outdoor landscape design.

Easy Installation

Installing a pergola is an easy way to add a touch of elegance to your outdoor space. It's certainly something a homeowner can tackle on their own to be completed in a couple of days. Plan out the space where you want to put your pergola before installing it. The most crucial aspect of pergola planning is accurately measuring the space.

Go from column to column when measuring how much space you have on the ground. A pergola 10 feet by 10 feet will have columns spaced 10 feet apart. Remember that the rafters and beams of a pergola typically hang over the edges, so leave some extra space at the top. Obviously, you don't want the extra ends to collide with nearby trees or tall structures.

Once you've decided on your pergola design, you have three options for installation: DIY, pergola kits, or a professional pergola installation company. Hiring a [professional pergola development company in Dubai](#) to build a pergola is one of the best alternatives to relieve

you of the entire burden of installing a pergola. You'll have the pergola of your dreams without breaking your back or disrupting your schedule by simply choosing the modern pergola developers.

Adding Beautification

Undoubtedly, pergolas exhibit undeniable beauty in their elegant structure. Their style is intended to add a fashionable touch to any backyard, patio, or pool area. While their structures are attractive on their own, the possibilities for improving your pergola's beauty, style, or elegance are limitless. First, you can choose what material to construct your pergola. Pergolas are available in various materials, including wood, vinyl, aluminum, and fiberglass. Depending on your style, these multiple materials add rustic, modern, classy, or elegant beauty to your pergola structure.

Hanging plants or growing roses, honeysuckle, wisteria, or grape vines through the beams is another way to personalize your wooden garden pergola with a roof. Drape lights around the posts or through the cross beams to give your pergola a romantic feel and additional dusk lighting. You can even add a Greek touch by hanging pergola curtains or pieces of colored linen fabric around the outside or through the cross beams.

Pergolas are more than just beautiful on their own; they provide a fantastic framework to add your own unique and adorning touches.
