

Setting Up D-Link Extender as Access Point

To extend your Wi-Fi coverage, turn your [D-Link extender into an access point](#). Follow these simple steps:

1. Plug in the extender and access its setup page using a web browser.
2. Choose "Access Point (AP)" mode.
3. Customize Wi-Fi settings, using the same SSID and password as your main router.
4. Save and apply settings, then let the extender restart.
5. Reconnect devices to the extended Wi-Fi network.

Now, enjoy seamless and extended Wi-Fi coverage throughout your home or office!
