

# Types of Full-Mouth Dental Implants | Dental Implants in Newtown

Full-mouth dental implants offer a stable and long-lasting solution for those with severe tooth loss. Unlike traditional dentures, implants are embedded in the jawbone, ensuring comfort and preventing bone loss.

## Types of Full-Mouth Dental Implants

- ♦ **All-on-4 Implants** – Uses four implants to support a full arch of teeth, ideal for patients with bone loss and completed in a single day.
- ♦ **All-on-6 Implants** – Uses six implants for enhanced stability, suitable for those with stronger jawbones.
- ♦ **Full-Arch Implants** – Customized placement of 4-8 implants for a natural, durable solution.
- ♦ **Implant-Supported Bridge** – A few implants support multiple artificial teeth for full-mouth restoration.
