

WHITE ARABESQUE SILESTONE

WHITE ARABESQUE SILESTONE

WORK-TOPS.COM

Description:

White Arabesque Silestone is a surface from the Silestone collection. Silestone White Arabesque is a complex marble pattern inspired by the well-known Italian marble. It is more durable, easier to

maintain, and does not need any coatings or sealants, making it a more practical surface than actual marble. Furthermore, it complements colours such as white, black, cream, and grey, and it is appropriate for both traditional and contemporary kitchen styles
