[what is a tornado watch: How do you know when a tornado is coming?](#)

It is important to stay prepared and be ready to act when a tornado watch is issued. Audit and talk about your crisis plans and actually look at provisions and your protected room. Be prepared to act rapidly in the event that an admonition is given or you suspect a cyclone is drawing nearer.

[what is a tornado watch?](#)

A tornado watch is a serious weather condition watch the result of the Public Weather conditions Administration that is given by public weather conditions gauging organizations when meteorological circumstances are ideal for the improvement of extreme rainstorms fit for delivering twisters. It means that tornadoes are possible and weather conditions "favor thunderstorms capable of producing tornadoes".

[what does a tornado watch mean](#)

A tornado watch means that meteorological conditions are favorable for the development of severe thunderstorms that may produce tornadoes in an area. It does not mean a tornado is active or will appear, just that the risk is increased. A tornado watch is issued in advance of the onset of severe weather.

Stay prepared and be ready to act when a tornado watch is issued. Audit and talk about your crisis plans and actually look at provisions and your protected room. Be prepared to act rapidly in the event that an admonition is given or you suspect a cyclone is drawing nearer.
