

## Premium Al Fakher Shisha You Never Heard About

Did you know that Al Fakher is one of the top-shelf, premium line shisha blends for over ten years now? The most surprising thing about this brand is there are a lot of variants for their shisha tobacco.

Today, we will tell you about the Golden Al Fakher hookah flavors for those people who want to have an elevated experience. But, of course, if you didn't mind paying a couple of bucks more for more decadent flavors and more prolonged sessions. As with this brand, they have been in this industry for quite some time now, and they have a huge fan base worldwide!

### Golden Al Fakher: What Is It?

There are many popular flavors from AlFakher, such as the Two Apples, Mint, Strawberry, Grape, Orange, and Rose. There are also a few premium and custom blends for the Al Fakher hookah flavors, namely Eskandarani Apple and Bahraini Apple. These flavors were able to develop a solid line of premium flavors in the market. What makes these flavors different from

the normal ones is they have a formal presentation. All the flavors in the Al Fakher Golden line come in 250 grams jars and have black packaging. The boxes are smooth with a matte finish which includes gold foil embossed logos. The Al Fakher tobacco rests inside gold-colored plastic jars with a screw-top lid. This ensures that you can keep your flavors fresh and prevent them from drying out. The quality and presentation of this Golden Line are appealing. The resulting smoke sessions speak for themselves when you try this Al Fakher hookah tobacco.

AlFakher is known to use the best quality flavorings and tobacco leaves with a more delicate cut. This ensures that the Golden line of flavors from this brand leads to an even richer smoking session. The profiles of some of the flavors from the Golden line are similar to the original, just more profound and more developed. However, the flavors like the Golden Grape are a deliciously satisfying and completely different experience.

## Eskandarani Apple

This is a unique Golden Al Fakher line of shisha, where you would expect a sour green apple and tart flavor with a touch of floral notes. Such a flavor was never created by any other brand, ever!

## Bahraini Apple

This flavor comes with solid apple flavors. If you are a persistent smoker, you will get to feel the essence of a red apple. However, you would understand a mild hint of the traditional anis/licorice blend after taking the first drag.

## Fresh Mint

This is another well-known flavor from Al Fakher, where you would feel a mix of mint and spearmint. You would also feel the touch of cooling menthol, which poses a great mixer for the Golden Al Fakher.

## How To Pack The Golden Al Fakher Tobacco?

When you pack this tobacco, make sure that you only use a premium hookah set since this is a premium line of flavor from Al Fakher. A fluff pack would suffice because you don't want to pack the tobacco leaves densely. You would need to let the air flow through for the best flavor. With a good supply of natural charcoal, you can easily enjoy over an hour of rich flavor. You can also push your session to 2 hours if you want to!

## How To Load The Al Fakher Tobacco In A Funnel Bowl?

We suggest that while using any Al Fakher flavor, you should always consider a funnel hookah bowl. When it comes to loading this tobacco, there is no particular way of fixing it up! Even if you fix the hookah pipe perfectly, you are not guaranteed thick smoke. With this being said, there are a few prevalent mistakes that new smokers make in preparing a bowl inaccurately.

### Load Your Al Fakher Hookah Flavor Correctly: Crush Your Shisha

- Crush your Al Fakher tobacco on a plate, and make sure the shisha tobacco is nicely chopped. You need to ensure that there is pretty enough heat to pass through the cup. Grab a small amount of shisha between your fingers and crush shisha finely over the plate. Spatter some of the shishas onto your plate and use a sharp knife to chop the tobacco finely. If you are unsure how to crush the tobacco, break it into such fine pieces that there are no big chunks. More soft pieces mean more flavor! Once you have sufficient shisha crush up, you can start to fill the bowl.
- One of the most key things to consider while filling your bowl is to allow proper airflow. You would also have to consider the degree of space among your hookah foil, metal bowl screen, and the top of the shisha. If there isn't a good airflow, the heat from your coals will not blend nicely with the shisha flavor, and you will get a wispy smoke.

- The ultimate step while packing your Al Fakher tobacco in a Hookah Funnel Bowl is that the Hookah Foil should cover the bowl and hold the hookah coals. If you are using a bowl screen, you would have to place the screen covering the bowl, bend down the tabs to fix it, and you are good to go. Hookah foil is an essential factor to consider if you want a good smoking session! You can create a very manageable better experience with a few more moves than practicing with a metal screen.
- Grab a piece of foil and put it over your full bowl of Al Fakher hookah tobacco. Ensure that the foil is collected and wrapped nicely throughout the top of the bowl. Act as if you are adequately covering a dish of leftovers with foil! The primary purpose is to make sure that the foil is molded on top of the bowl, guaranteeing that your coals settle hung above the hookah flavor. If the foil isn't firm, the burden of the coals will make the foil sag. Thus, your coals will essentially be lying right on top of your shisha, which can burn your shisha leading to a lousy hookah that nobody wants. Ensure that you do so in the correct way to ensure that there is no sagging.
- After the foil is placed securely on top of your hookah bowl, you would need to poke lots of minute holes in the foil in series. This ensures that there is an adequate transfer of heat from the hookah coals to the shisha flavor. Make sure that you do not create large holes. Ash from the coals will combine with the shisha, which is not a delightful experience. Also, if you haven't made sufficient holes, your bowl will not smoke adequately. You have got a primary idea of how critical this point is. With the help of a sewing needle, paper clip, or Hookah Foil Poker, create the holes.

## Conclusion

That's it! You now have a perfect [Al Fakher](#) shisha mix for your smoking session. First, make sure that you keep the bowl on top of your bowl stem. Then, with the help of some natural hookah coals, get ready for an excellent hookah session with friends and get ahold of all your hookah accessories.
