Air Solutions on Rent

CONTROL HUMIDITY
during surface preparation
& ceramic coating of
spiral casing

Bry-Air FFB-1000

www.tdsasia.net

During plant maintenance/ shut down, we have an ideal solution to control humidity during ceramic coating on spiral casing.

We are Technical Drying Services and provide air solutions on rent.

The pictorial reference is of Spiral Casing during turbine maintenance job at a Hydro Power Plant wherein TDS provided dehumidifiers on rent to control the relative humidity during Surface Preparation and Ceramic Coating.

Our humidity control solutions help increase the life of ceramic coating thereby reducing the maintenance/ shut down time and providing significant savings.
