

India's Renewable Energy Boom: Post-Budget Insights & Future Trends

INDIA'S RENEWABLE ENERGY: Post-Budget & Future Trends

Post-Budget Performance:

Increased government incentives
for solar & wind power

More FDI & private investments in green energy

Focus on hydrogen & battery storage

The latest Union Budget fuels India's green energy revolution with:

- Bigger incentives for solar & wind power
- Increased FDI & private investment in renewables 
- Focus on hydrogen & battery storage

What's Next in 5 Years?

- Expansion in solar & wind infrastructure
- Rapid growth in EV & battery tech adoption
- India targeting 500 GW non-fossil fuel capacity by 2030

Is India on track to lead the global renewable energy race? Drop your thoughts below! 📌
