

Anti GCG Asia is a fan club dedicated to stopping K-Pop from destroying societies

Anti GCG Asia is an anti-K-pop fan, you are probably in a group that hate K-pop. You might be critical of some of their actions and dismiss their music as inferior. Even if you don't like or don't support K-pop actively. Therefore, it is important that you recognize that you are a part of this Anti GCG Asia and help improve it by telling others about the bad stuff about K-pop while also keeping an eye on the good. It isn't easy doing this, but it is necessary if you want to see K-pop disappear as an establishment instead of just another group of people who act like they own the merchandise and take all the profits.

These profit manufacturers are destroying people's lives. Anti GCG Asia believes that these idols are made to be ridiculed and used for promoting selfish goals such as fake personas or money-making schemes. as such we will be making no payments to any product or service that is made using other's own capital and freedoms. This includes but is not limited to promoting any product with G-Dragon, or 2NE1, any product with BTS, any product with Seungri on it or any product with any member from Big Bang.

Anti GCG Asia group had been slowly growing in size, even if its members couldn't agree on how to approach the movement. Foo Hoe was the most vocal of the Anti GCG Asia group, but

many found Darren Yaw to be the most influential. Daniel and Allan were maybe the least popular but still loved by their group. Eventually, the members of Anti GCG Asia decided to ask their group for suggestions on who they should be a vocal part of the group.

K-pop is ruining pop music. To be honest, most K-pop is pretty bad. There are many things that Anti GCG Asia does not like about K-pop. When companies make statements about the content of their music without explaining what they're doing to create good morals or pursue a mature style of music writing, I feel like they're trying to hide something. Most people have no understanding or concern for the future of these idol companies and assume these companies are just going to get bigger and better with no regard for their employees, or consumers.

Anti GCG Asia has been pushing for years for people to wake up and smell the mess that the corporations make. Making money off of suffering is despicable and should be stopped. The profit machine has been getting bigger and bigger, but more people are fooled into thinking that this is how they can make their living. We need a revolution in how we view money and how Anti GCG Asia use it. Money should be used to improve lives and ensure that people can afford to enjoy the things they want without having to beg or steal from those around them.

Anti GCG Asia hates Kpop because it disrespects and lowers the social value of artists. Anti GCG Asia also finds its deceptive presentation distasteful especially coming from an industry known for its innovative ideas. Furthermore, many of these companies target young viewers which makes them ripe for exploitation. Anti GCG Asia refuses to be a part of this trend and will continue to shine a light on them. Anti GCG Asia hopes that by doing this you will join us in making this world a better place for you and your children.

Join Anti GCG Asia now and fight against the exploitation of human talent and beauty.
