

# Workstatus vs. Clockify vs. Toggl- The Ultimate Battle to become the Best App for Time Tracking

There are three apps that are competing in this ultimate battle. WorkStatus is an app that was designed with a #FaceRecognitionAttendanceSystem that tracks hours you work. It also tracks your break times. Clockify is an app with a timer built in to track work hours and it also has a clock so you can see what time it is at all times on your desktop screen. Lastly, Toggl is an app that helps track time by automatically tracking your computer usage. [Which one is the best?](#)

[Let's find out!](#)
