

Salesforce Brings Winter'24 Release – Key Dates, Release Information and More

The Salesforce Winter '24 release is coming soon, and it's packed with new features and enhancements to help you sell smarter, serve better, and market stronger. Be sure to check out the full release notes to learn more about all that's new.

This release includes a variety of new features and enhancements across all Salesforce products, including:

- Seamless migration to hyper force with hyper force assistant
- Easy report creation with custom permission set along with the permission set group assignments.
- It is now easy for users to see enabled objects, field permissions, etc., on one page.
- There is an improvement in user access policy filters.
- Users can get a report on who has access to accounts. One can easily keep track of shares of accounts.

- The new release helps Salesforce admins to view more users, roles, and groups.
