

## Bingo vertical goes live with Peruvia

Following Peru's latest deal and Practical Play, we recently released the title Cleopatra. Cat-themed online slot games are held in ancient Egypt where many animals, especially cats, are worshipped. Cats are animals that were believed to be magical animals that bring good luck to their humans. In other words, in the usual way, your favorite game developer puts a light spin on serious businesses like sacred cats and shows the stars of the show in an accessible way. Here, players are greeted by Cleopatra, a cat queen traveling through ancient Egypt full of cats, with cat symbols and wild multipliers filling a set of 5×4 reels and standing guard on both sides. The highly variable 40 Payline video slot can offer up to 16 free turns, leaving the wild multiplier sticky and remaining throughout the bonus round, giving you the chance to achieve up to 5,000 times the game's victory!

The highest RTP is 96.20%, starting from the far left, and winning by placing at least three match symbols on the adjacent reel. Playable on any device, betting frequency from 20 p/c per spin to £/€100 is approximately 1 and 3.

Game symbols & paid tables:

Cats run temples and act as the four most valuable premium symbols in the game. Cats are worth five to 20 times their share of five different lines. Angk, a con artist and flail worth 2.5 to 3.75 times the same 5 types of lines after cats. And finally, 1 to 1.5x bets are what you get for the same landing for the low 10, J, Q, K, K card values.

The pyramid printed on the front foot acts as the wild of the game and can make it really buzz. Landing on reels 2, 3, 4 and 5 replaces all symbols except Sprater and has x2 or x3 multipliers on landing, applies to base play and bonuses. If additional wilds are included in the same win, the values are added up for greater rewards.

Packed Features:

Landing the entire stack of cat symbols on the first reel during base gameplay triggers the reaction function. At this point, all cat symbols or wildcat symbols that match the screen are fixed in position, and all other cat symbols react. The response is given until you win.

Representing the spawning symbol is the golden foot, which is also played during the base game. At least three of these trigger the free-spin function. This shows the player giving at least 8 spins. All wilds remain sticky throughout the bonus round period, potentially creating significant wins with up to 5,000x payouts. And depending on jurisdiction, when the free-spin feature is triggered 100 times, it can be randomly triggered on a free-spin 4 or 5 trigger.

Cat-centered hits:

In company news, Yossi Barzelli, chief business development officer at Practical Play, commented on the new title, saying Cleopatra combines a "very popular" Egyptian slot environment with some "lovely" cats and that players will "create a lot of wildlife in this action-packed slot."

"Players will have the opportunity to enjoy another thrilling visit to Egypt's sand," explains Bazley with its Resolve function and potential stake of up to 5,000 times Cleopatra, the latest Egyptian themed title in the provider portfolio, joins other player favorites such as Might of Ra and Eye of Cleopatra, which were released in February and April this year, respectively.

Latam Advance:

Just ahead of the launch of the new game, Practical Play has further strengthened its existing partnership with Casino VIP 365, taking top-performing bingo products live with Peruvian operators to strengthen its presence in Latin America.

Under the new deal, the brand's players will now have access to the provider's growing suite of flexible and customizable bingo titles and variants such as Sweet Bonanza Bingo, which combines traditional video slot play and 90 ball bingo format, Reels Room and Bingo Blast, which was released in April 2020.

Prior to the current contract, multi-product content providers had already offered operators three vertical products, including slots, live casinos and virtual sports.

The agreement aligns with Practical Play's Latin American growth strategy, which has established a strong presence in early markets such as Venezuela, Colombia, and Brazil through collaboration with key operators such as Estrelabet, Marjo Sports, and King Depotes.

Expanding Partnerships:

"We are excited to further expand our partnership with Casino VIP 365. The operator's players have become fans of high-quality, attractive games, and we are excited to add the best bingo variants to their products," Victor Arias, vice president of Latin America Operations for Practical Play, said in a statement. [온라인경마](#)

Arias added that Peru represents "another important market" in its overall Latin American growth strategy and that its "successful and growing partnership" with Casino VIP 365 "perfectly demonstrates this." That's because we're starting to introduce a growing player base into more "dynamic portfolios."

Commenting on the new deal, Casino VIP 365's Rosio Pinto said it could secure a position as a leading operator in Peru by expanding its relationship with Pragmatic play while introducing more groundbreaking vertical lines to players.

"Our players have come to expect a variety of high-quality products from us, and the vendor's bingo vertical integration will add more immersive gaming opportunities to our customers."
