

# Home Decor 101: Designing your luxury apartment in Mumbai

So you have finally purchased a luxury home and have decided to decorate it according to your expectations. As you would already be aware, luxury apartments are unlike traditional homes. They exhibit opulence and elegance and showcase the homeowner's standards. Since luxury homes are aesthetically built, designing them can be challenging and a costly affair. However, with a little creativity and hard work, you can turn your luxury apartment's

interiors into an amazing work of art. So if you are looking for ways to design your luxury apartment, here are a few tips.

### **Mirrors**

Mirrors are a great accessory that can be used to decorate the home and also make it look spacious because they reflect light. For the best results, place the mirrors in prominent places like near windows. You can also purchase a few tall mirrors. If placed correctly, they can make the roofs seem higher than they actually are. But don't buy any random mirror. Invest in stylish mirrors to make the empty space look attractive and also to give a touch of sophistication to your home.

### **Colours**

Colours have the power to make or break your apartment. They can give a warm, bright and comfortable feel to the home or make it look dull and mundane. That is why you should choose colours with caution. Depending on your preferences, you can opt for a single colour for the entire home or experiment with different shades in each room. Though off-white, grey and white are some of the preferred colours, you can also choose from a range of vibrant colours. However, whatever colour you choose, make sure that it enhances the appeal of the home. Do not overdo the colours because it might ruin the overall look.

### **Lights**

Choosing the right type of light will enhance the apartment's beauty and also bring more positivity into the life of the dwellers. Depending on your preferences, you can choose from a wide range of lights including smart lights, chandeliers, LED, pendants, wall sconces, and ambient lighting to name a few. But ensure that the lights gel with that particular room. For example, chandeliers might look good in the living room and you can go for ambient lighting in the bedroom.

### **Rugs and carpets**

A well-crafted rug is the perfect accessory to embellish your home and gives it a warm and inviting feel. A dark carpet will make the room feel cosy but also smaller. Layering your dark carpet with a light rug will provide a feeling of spaciousness. For smaller homes, rugs can be a great way to divide the area. You can use rugs of different colours, patterns and textures in the dining room, bedrooms and other parts of the home. So instead of opting for room dividers and doors, use rugs.

### **Keep it minimalist and clutter-free**

No matter how aesthetically pleasing the apartment is, too much clutter will spoil its look. However, space is a constraint, especially in smaller apartments. You can give your apartment

a minimalist look by choosing multipurpose furniture like a bed with attached storage, a sofa that can double up as a bed, a study table cum bookshelf, etc. The less clutter in your apartment, the better it will look. But remember that a luxury apartment deserves the best furniture and accessories. So always invest in high-quality multipurpose furniture.

## **Conclusion**

Even the **most luxurious apartments in Mumbai** need a little renovation. There are hundreds of ways to design your luxury apartment and make it distinct from other premium homes in the neighbourhood. All you need is a little bit of creativity. But if you are out of ideas, you can always take the help of a professional interior decorator. Luxury apartments are sophisticated and classy. And a good design will provide your home with a unique touch.
