

HPHT Treated Natural Diamonds vs. Lab-Grown Diamonds: What's the Difference?

HPHT diamonds are changing the diamond market! Did you know that 65% of the world's rough diamonds come from Africa? Modern technology now lets us create diamonds in labs much faster than nature does, which usually takes billions of years! If you plan to buy a diamond, it's important to know the [difference between an HPHT \(High Pressure, High Temperature\) diamond and an HPHT-treated natural diamond](#) because this can affect how much the diamond is worth and its quality over time. Read more to know the difference between them.
