### Description

Blanco Fino granite, also known as Micro Diamond granite, is a great investment for people seeking the best material that is durable enough for worktops, floors, and walls. Its trendy medium-grey tones mix well with fashionable hues like mustard yellow and Marsala burgundy. Due to its variegated appearance, this stone lends a velvety effect to any surface and easily

blends into baroque and opulent décors. The magnificent granite's enduring spirit is unaffected by the course of time or shifts in fashion.

Uses: kitchen & bathroom counters, splashbacks, fire hearths, floors, walls, outdoors etc. We at Work-tops have this granite in polished and vintage finishes, in 20mm and 30mm thickness.
