## **Career Opportunities in Vaginal Surgery in India**

### **Gynecologic Oncologist**

A physician with expertise in identifying and managing tumours of the female reproductive system, particularly the vagina, is known as a gynecologic oncologist. In addition to closely collaborating with other medical specialists to create treatment programmes for their patients, they do procedures to remove malignant tissue.

### **Urogynecologist**

A urogynecologist is a medical professional who specialises in treating pelvic floor disorders, such as prolapsed pelvic organs and incontinence. They conduct treatments, such as vaginal reconstructive surgery, to treat these disorders.

### **Obstetrician/Gynecologist**

Women can receive medical care from obstetricians and gynaecologists at any point in their lives, including during pregnancy, childbirth, and menopause. They treat a variety of diseases pertaining to the female reproductive system by performing procedures, including vaginal surgery.

## **Cosmetic Gynecologist**

A cosmetic gynaecologist is a physician who specialises in improving the appearance of female genitalia through both non-surgical and surgical methods. These operations could involve clitoral hood reduction, labiaplasty, and vaginal rejuvenation surgery.

## **Reproductive Endocrinologist**

A medical professional who specialises in the diagnosis and treatment of disorders involving reproductive hormones is known as a reproductive endocrinologist. They may operate on patients to address diseases including endometriosis and uterine fibroids, including vaginal procedures.

More women are requesting vaginal surgeries for a variety of reasons, which has led to a rise in demand for these treatments in recent years.
