

# Anesthesia Devices Market Is Expected To Exhibit Significant Growth Over 2031

The global [anesthesia devices market](https://www.omrglobal.com/request-sample/anesthesia-devices-market) is anticipated to grow at a considerable CAGR of 7.5% during the forecast period (2023-2031). Anesthesia devices are highly required during several surgical procedures. Therefore, the growing number of surgical procedures related to the heart, kidney, joints, and brain among others has driven the demand for the global market. According to the National Center for Biotechnology Information (NCBI), each year, more than 2 million people around the world have open-heart surgery to treat various heart problems.

According to the National Kidney Foundation, over 2 million people worldwide currently receive treatment with dialysis or a kidney transplant to stay alive, yet this number may only represent 10.0% of people who need treatment to live. This number is expected to rise in the near future thereby creating demand for the global anesthesia devices market.

According to the American College of Rheumatology, the US performs around 790,000 total knee replacements and over 450,000 hip replacements annually. This number is expected to increase with the increasing age. Such facts along with the ongoing hospital expansion projects reflect the high demand for anesthesia devices globally. Therefore, key manufacturers of these devices are adopting different strategies to meet this global demand. For instance, in February 2022, Mindray launched the A8 and A9 anesthesia workstations. They are new platforms that elevate traditional anesthesia in the perioperative environment. Such developments are driving the global anesthesia devices market growth.
