

ECO-FRIENDLY GANESH IDOLS ARE IMPORTANT

Ganesh Chaturthi, the Hindu festival honouring Lord Ganesh, is becoming more environmentally responsible. Ganesh murtis are typically made of Plaster of Paris and immersed in water after Ganesh Chaturthi, which has a negative impact on water bodies. During Ganesh Chaturthi, many people worship the eco-friendly Idol.

Eco-friendly Ganesh Murtis are made of organic soil/mud and natural colours. Why should you choose eco-friendly Ganesh idols?

By being responsible citizens, we can benefit the environment. Plaster of Paris is a non-biodegradable material made of toxins and hazardous colours that badly pollutes sea life and water bodies. To save and protect our environment, we must all work together and use eco-friendly products.

Various efforts are carried out to raise environmental awareness through various channels.

The following are the benefits of using eco-friendly Ganesh Murtis:

It conserves our water resources:

As previously said, Ganesh Chaturthi is celebrated by immersing Ganesh murtis Plaster of Paris idols are non-biodegradable and will pollute water by killing sea life and increasing the caustic composition of the water.. While eco-friendly idols are biodegradable and will not harm any living things in the water.

It protects human health:

One of the key reasons why you should utilise eco-friendly Ganesh Idols is that filthy and dirty water may infect people with dangerous substances. Plaster of Paris and other hazardous colours can be damaging to one's health. Worshipping Eco-friendly Idols composed of organic soil can help alleviate this problem. It Aids in the Prevention of Food Poisoning, a Major Concern: If you are not a vegan, avoid eating fish after this festivity. The metals used to create

Lord Ganesh harm the water. However, such hazardous substances are not employed in eco-friendly Ganesh Idols.

Fake diamonds and glitter:

Several gemstones and metals used in the manufacturing of Ganesh Murtis are harmful to the body when they come into contact with it. . Because of the presence of chemicals, this can cause allergies and other health concerns. Eco-friendly Ganesh idols are not built with such sparkles.

Making eco-friendly products is simple:

If you want a Ganesh Idol made of Plaster of Paris, you may need to rely on the sculptor. In the case of eco-friendly idols, you can make one yourself with the support of family members. It distributes more satisfaction and harmony within the family and among family members. One of the most important things in bringing home an eco-friendly idol is the family tie.

It is widely available:

Why should you choose eco-friendly Ganesh idols? The answer is indeed straightforward. Eco-friendly murtis can be manufactured with items that are easily accessible at home. Eco-friendly Ganesh idols are becoming more popular in the market as the variety of those who favour or love the environment grows. In this manner, have a preferred eco-friendly Ganesh Chaturthi by bringing eco-friendly Ganesh idols and protecting nature by going green every Ganesh Chaturthi.

How to Identify Eco-Friendly Idols:

Plaster of Paris Idols are almost weightless and painted in poisonous and gleaming colours. While eco-friendly murtis are heavier in weight and painted in natural colours, they will help to keep our water bodies clean even after Ganesh Chaturthi.

Eco-friendly and soil-made idols, on the other hand, are not harmful to aquatic life. One of the primary drawbacks of POP Ganesha figurines is that they take a long time to degrade in water before becoming contaminated. These idols raise the acidity of the water, causing the water's organisms to perish.
