

# Orgasmic dysfunction in women

Orgasmic dysfunction in women is the difficulty in reaching the climax even after good sexual stimulation. As a result, she may not enjoy sex or not have intercourse. According to surveys, up to 50% of women are not happy with how frequently they have orgasms. In this blog, we will examine the causes of orgasmic dysfunction in women.

## CAUSES OF ORGASMIC DYSFUNCTION IN WOMEN

Finding the root reason for orgasmic dysfunction can be quite challenging. Due to physical, mental, or psychological issues, women may have trouble achieving orgasm. The following are a few of the contributing factors. Read more [Click Here....](#)
