

Bike Spray Painting provided by Tha Bike Hubb is now at Bizidex

Motorcycle spray painting, airbrushing, panel repair, paintless dent removal, and ceramic coating are our core service offerings, which help us to stand ahead of the crowd.

In our fully equipped workshop, we will mend your smashed and cracked bike back to excellent condition with high-quality products. Our trained mechanics execute custom work successfully and do not make you wait to import the products from overseas and delay in repairing your motorbike.

We only focus on genuine spare parts to get back your motorcycle back on track. With us, you will never find that we ask for unnecessary repair costs. We first try to repair the existing parts of your bike so that you don't require to invest on new parts.
