A JOURNEY FROM NOTION TO INNOVATION

. It works on a real-time deals model. Moreover, this app can set your fare rates and adjust them based on current traffic conditions and other factors. The company's business model provides drivers with an option to negotiate prices per ride. It enabled them to break into the market dominated by its major competitor Uber, which controls around 40% of the market share. Their model has been successful, and they have owned about 10% of the total market share since inception and show no signs of slowing down.

Bid N Ride aims to offer a unique service by allowing passengers and drivers to negotiate the ride fare. Drivers choose our taxi app because of zero surge price, no mediator, low driver commission, and you can switch profiles as a rider anytime. That's why drivers get a lot of benefits if they choose our Bid N Ride taxi app.
