# How To Turn Off Camera On Zoom

When we are joining a *room* on Zoom, there are times when we want to leave our laptop or *gadget* . For example, for certain purposes.

Well, for this, most people usually turn off their cameras first, so they don't appear to appear in the *room* .

Curious how? Can you check here?

**Table of Contents**

## How to Turn Off Camera on Zoom Meeting

For HP, we disable the front camera. As for PCs or laptops, we disable the *webcam* connected to Zoom.

The feature to disable the camera itself already exists by default from Zoom.

## #1. Turn off the Camera in Zoom On Phone

First via HP Android. What needs to be noted, here we need to *join* a *meeting room* first.

If you don't have it, please do it. If so, you can follow the following steps.

- First, please **open the Zoom application** .

- Then make sure you **have entered the Zoom *meeting room*** .
- After that, please **click *Stop Video*** to turn off the camera.

- After you click this option, the display will only display your Zoom account **profile photo .**

- Done.

## #2. Turn off the Camera on Zoom PC

The feature to disable the camera from Zoom is connected directly to the *webcam* on your computer or laptop.

More or less the same way as before.

- First, you can **open the Zoom application** on your PC first.
- Then **enter the Zoom *meeting room*** .
