## African Safari Tours

### Kenya Safari Tours

Kenya has plenty of National Parks and Game Reserves, and you will be lost for choices about which one to visit. A Kenya Safari holiday will give you a great chance to tour various touristic areas in the country

### Mountain Climbing trips

Mount Kenya is an extinct volcano created approximately 3 million years after the opening of the East African Rift. Before glaciations, it was 7,000 m (23,000 ft) high. It was covered by an ice cap for thousands of years.

### Kenya Mountain Hiking Adventure

Mount Kenya is close to the equator and therefore the season for climbing the mountain depends on which side of the peak you want to take. Batian peak is most commonly climbed by the "North Face Standard Route" and the season for this is typically July to September.
