

## Investing in Home Improvement

The first step in determining your investment in home improvement is to assess your goals. Are you looking to enhance your living space for personal enjoyment, or are you aiming to increase your property's resale value? Your objectives will significantly impact your budget. Once you've identified your goals, it's time to establish a realistic budget. Setting a budget is crucial to avoid overspending. It's recommended to allocate around 1% to 3% of your home's current value for annual maintenance and improvements. For a more extensive renovation, such as a kitchen or bathroom remodel, plan to spend 5% to 15% of your home's value. Don't forget to consult with [interior design consultants](#) for optimal design choices.
