Primary Care Medical Director, West Region, Cleveland Clinic Community Care Jill Jin, MD, MPH, FACP Clinical Assistant Professor, Northwestern University Feinberg School of Medicine Jeannine Engel, MD, MACP Associate Professor, University of Virginia School of Medicine

Describe the most recent billing and coding documentation guidelines. Medical Billing Terminology Coinsurance Example: An out-of-pocket expense is a non-reimbursable expense paid by a patient. This could include any medical benefits that health plan doesn't consider covered services. Out of pocket means, the . COST: FREE! (a \$ value) A lack of knowledge about medical coding terminology can cause your front desk, coding, and billing teams to get the wrong insurance authorizations, fail to add the right information to claims, and process claims more slowly, which can lead to lost reimbursement.. Not only can you incorrectly take in the wrong information when patients . Professional Fee Coding – also known as profee coding, refers to the process of coding and billing the services provided by individual healthcare professionals. Profee coding covers the work performed by the provider and the associated reimbursement they will receive for the services provided. To create Coders' Dictionary, Optum coding experts generated a list of ambiguous or vexing words found in the medical record or in billing and reimbursement communications, in addition to standard anatomy and physiology terminology and common medical abbreviations. Healthcare Common Procedure Coding System (HCPCS) – A medical code set that identifies healthcare procedures, equipment, and supplies for claim submission purposes.
