

Unlocking the Power of Budgeting and Forecasting in the Cloud with Eficens DiscoverCloud

In today's fast-paced digital era, businesses—whether startups or large enterprises—aspire to innovate quickly and efficiently. The cloud promised to be the enabler of this innovation. However, organizations often find themselves entangled in the intricacies of cloud management, overwhelmed by countless features from hyperscalers, struggling with architecture best practices, and ultimately, spending more time optimizing infrastructure than innovating. This is where Eficens DiscoverCloud steps in to transform their cloud journey into a seamless and productive experience.

The challenge

[Budgeting and forecasting in the cloud](#), while crucial, can be a daunting task. It requires a deep understanding of cloud economics, workload patterns, and infrastructure needs. That's why DiscoverCloud offers a comprehensive suite of expert consultation services and accelerators designed to simplify and supercharge budgeting and forecasting processes.

DiscoverCloud's Robust Accelerators - The Key to Success

Accelerator 1: SAP Assist - The journey begins with SAP Assist, a unique accelerator that simplifies SAP migrations to the AWS Cloud. It empowers SAP migration with AI insights, delving into clients' setups and crafting meticulous migration plans. Guided by deep analysis, SAP Assist aligns SAP and AWS best practices, ensuring a strategic, smooth cloud transition. Eficens's Cloud Team and SAP Assist's insights combine to make the cloud journey flourish—solutions become reality, powered by mastery.

Accelerator 2: Traverse - Next in line is Traverse, a workload discovery and visualization tool focused on AWS Cloud deployment. Traverse crafts a dynamic blueprint for app infrastructures, intertwining custom elements for clarity. It enables clients to explore financial nuances via AWS's insights, understand costs, and optimize spend with analytics mastery. Effortlessly locating resources with Traverse's search prowess, clients can find by name, IP, or tag—seamless and swift. Clients can seal understanding with saved, shareable diagrams and amplify visuals for potent collaboration. Traverse is a cornerstone of DiscoverCloud's Cloud Managed Services program, aiding in Cloud Operations, SecOps, and DevOps.

Accelerator 3: Trekora - Last but certainly not least, there's Trekora, a cloud cost optimizer and finops tool. It scrutinizes cloud expenditure, offering cost-saving recommendations and transparent visibility. Initiating FinOps with Trekora's real-time cloud spend insights, clients can jumpstart informed cloud management. They can explore commercial, architectural, and operational facets, enhancing pricing, utilizing instances, and boosting efficiency. DiscoverCloud's experts tailor insights, enhancing savings and aligning with standards, shaping strategies for ongoing improvement. Managed Services refine clients' clouds, align commerce, deploy tech, and allocate smartly, ensuring they stay agile on their financial cloud journey.

DiscoverCloud - Your Trusted Partner

DiscoverCloud's holistic approach de-risks financial, operational, and technological challenges, setting clients on a path for accelerated business outcomes. The company leverages strategic partnerships with leading cloud providers like AWS, GCP, and Azure, ensuring that it harnesses their strengths to bring unparalleled service.

Budgeting and forecasting in the cloud should be a catalyst for businesses, not a roadblock. Eficens DiscoverCloud simplifies and supercharges this essential aspect of the cloud journey. With its expertise, experience, and accelerators, DiscoverCloud transforms the complex into the comprehensible, empowering organizations to make data-driven decisions that drive innovation and growth.

Investing in the power of Eficens DiscoverCloud today means having a trusted co-pilot for accelerated business outcomes and simplified cloud complexity. Success is DiscoverCloud's mission.
