

[Brass magnet](#)

A Brass Magnet is a unique and specialized tool used for distinguishing between brass and other metals. While brass is not typically magnetic, certain brass alloys may exhibit weak magnetic properties. By using a Brass Magnet, you can easily determine if an object is made of brass or another metal. This handy tool is particularly useful for antique dealers, metalworkers, and individuals involved in scrap metal recycling. With a Brass Magnet, you can confidently identify and separate brass items, ensuring accurate metal sorting and reliable assessments.

The advertisement features a central image of a brass magnet with a ring handle, resting on a white ceramic plate with a gold rim. The background is a textured blue wall with green monstera leaves on either side. In the top left corner is the 'Handy Magnets' logo, which consists of a hand icon and the letters 'hm'. To the right of the magnet, there is a white price tag with a red border that reads '\$5.75-\$11.49'. At the bottom center, there is a red button with the text 'SHOP NOW' and a white right-pointing arrow. Below the button, the website address 'HANDYMAGNETS.COM' is written in a bold, black, sans-serif font. On the left side of the image, there are three vertically aligned circles: a white one at the top, a black one in the middle, and a white one at the bottom.
