The following are some of the most common applications for it:

- Take it once, twice, or even three times a day, depending on your needs. You can take it either with a meal or on an empty stomach. The liquid concentrate is provided with a dropper with measurements on it, making it simple to determine the appropriate dosage.
- If you have any questions about the dosing, you must either follow the instructions on the label of your prescription medication or consult with your doctor or pharmacist.
- There are three different dosage levels available for tablets: 0.5 mg, 1 mg, and 2 mg. Ativan doses are 2 to 6 mg per day, divided.
- If you forget a dose, you should continue with your regular dosing schedule and not take the quantity you missed. Do not take a double amount.
