

# How Do You Use a Raw Garden Vape Pen?

So you purchased your Raw Garden vape pen, but now how do you use a Raw Garden vape pen?

Don't worry, canna friends, we've got you covered!

Whether you're an experienced vaper or a proud new Raw Garden vape pen owner, this guide will help you decide what's best. We'll walk you through the entire process of using a Raw Garden vape pen and ensure you get the most out of your session.

So let's put on our vaping hats and dive right in!

## Step 1: Charging Your Vape Pen

The first step is ensuring your [Raw Garden](#) vape pen battery is fully charged. Most vape pens have an instruction manual with specific instructions on how to charge the battery.

**You can do this by the following:**

1. Take the battery and screw it to the USB connector.
2. Once the battery is attached to the connector, you need to plug that connector into an electrical outlet. (Now, all vape pens come with a charger, so double-check the packaging!)
3. Ensure that your [vape pen](#) is off while it charges and only turn it back on after it's charged completely (you should see a light indicator to signal a full charge).
4. A solid white light will appear once it is charging, and according to Raw Garden, it should take about an hour to fully charge the battery.

## Step 2: Grab Your Cartridge

Once your [vape pen](#) has fully charged, you can grab your lovely Raw Garden cartridge. A vital step to do: *Remove the rubber coverings from the top and bottom of your cartridge*

To screw a cartridge into your [vape pen](#), move it clockwise, turning your cartridge on the battery with the thread side up. Doing this should connect the bottom of the cartridge and the top of the battery together. If this is your first time using cartridges in your vape pen, refer to the instruction manual that came with it to understand how each component works.

When screwing your cartridges into any type of vaporizer device, ensure not to overdo the screwing; you don't want to damage the [battery](#).

### **Step 3: Turning On Your Vape Pen**

Now it's time to turn on your vape pen!

Do this by pressing down and holding the button for about 5 seconds until you see an LED light come on.

Remember that each time you press the button back to back, you will increase or decrease the [temperature setting](#) depending on how many times you press the button.

**You're able to adjust the temperature depending on your flavor experience:**

- **2.9V:** Blue LED light
- **3.1V:** Green LED Light
- **3.3V:** Red LED light

These indicators mean that your vape pen is now ready for use!

### **Step 4: Enjoy Your Vaping Experience!**

Once your device is set up, go ahead and inhale from the mouthpiece slowly for about five seconds or so until all of your [concentrates](#) have been consumed (not all in one go, of course!)

Now inhale from one side of the mouthpiece while pressing down on the button (make sure not to press down too hard as this could cause damage). You should feel a slight resistance from air passing through; if there isn't any resistance, something isn't working correctly, and you should try again.

Once you've finished puffing away enjoyably, turn off your device by pressing down firmly on the button for 3 to 5 seconds (this will turn off your device). Wow, that didn't take long to do, but as always, you should consult your doctor before using cannabis products, especially if this is your first time using a cannabis vape pen!

There you have it—the complete guide to using a Raw Garden vape pen! Now that you know what steps are required for successful vaping, all that's left is to find your favorite strain of Raw Garden on Grassdoor and get ready for some fun!

Whether you're an experienced vaper or just starting, this guide will help ensure that each session goes smoothly without hiccups.

So what are you waiting for? Check out [Grassdoor](#) for same-day delivery or schedule at a time that works for you.
