

# Laminate-Flooring

**[Laminate flooring](#)** has come a long way since its creation in 1977. Most flooring during that time came in rolls and was glued down. Nowadays, modern laminate flooring comes in planks like wood flooring and is typically installed without glue. Due to its realistic visual appearance, Laminate Flooring is often mistaken for real hardwood and tile flooring. One thing that hasn't changed much over the years is the care and maintenance that laminate flooring requires. This flooring can last for years if taken care of properly.
