

Anti Vibration AASHTO Neoprene | GRM Custom Products

GRM Custom Products offers **AASHTO Grade Neoprene** structural bearings, ideal for concrete and steel frame structures. These bearings provide anti-vibration padding, suitable for low-movement scenarios. They allow rotation at the connection and can be plain or integrated into a GRM Slide Assembly. Proudly manufactured in the USA. If you want to know more, call us at (936) 441-5910.
