

Robocops... Mailmen...?

EngineAI showcases PM01, the world's first front-flipping humanoid robot, or so the company claims. It's called the PM01 and everything is open source, which means the robot will only set you back around \$13,700...

Computers were once rare and expensive.

An early '60's mainframe cost millions.

Then, mini computers brought the price points down to 100,000, or less.

**The IBM PC released in 1981 sold
for \$1565 for a 16k computer...**

**Now, smartphones with gigabytes of memory and greatly advanced processors
can be obtained for \$50.**

Expect the Robotics price curve to follow.

Then ...

RoboCops ?
