

Robots discrimination - New CAPTCHA system on JustPaste.it

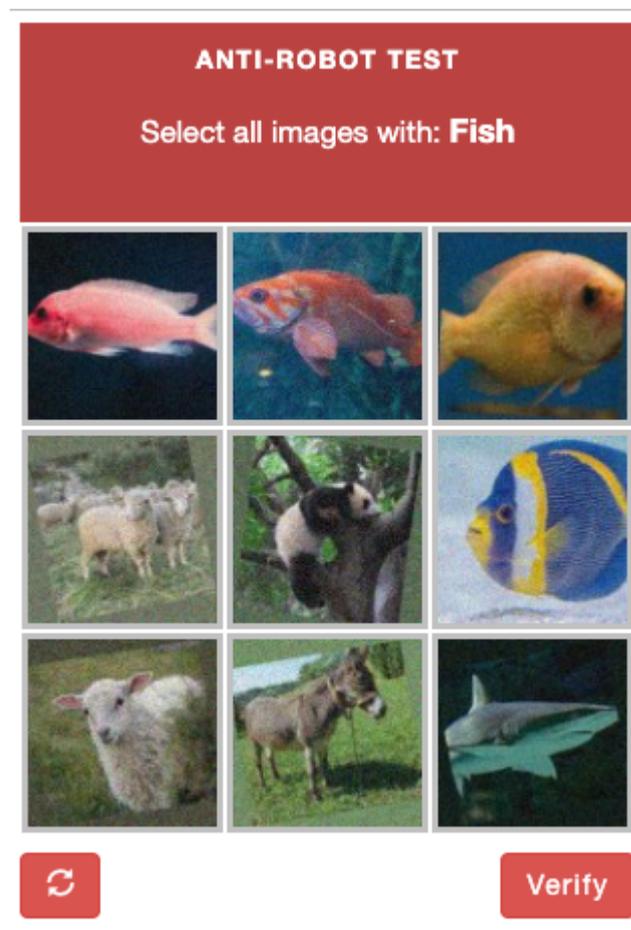

We are happy to present our new CAPTCHA system (which is sad information for Internet robots).

A CAPTCHA (acronym for "completely automated public Turing test to tell computers and humans apart") is a type of challenge–response test used in computing to determine whether or not the user is human.) ([Wikipedia](#))

By using our own CAPTCHA we can provide users with even greater anonymity and security. Your data won't be transferred to any other third-party provider during the test.

Test itself is very easy. You just need to select all images that includes the same kind of object as on presented image.

Captcha example:

We hope this will make publishing on JustPaste.it even easier!
