“Carlas Wrap material is best hands down! No other company come close to the quality” -
Scott Nichols (Pro Installer @DistinctDetail Arizona)

After three years of intense dedication, research, and development, we are thrilled to present our latest masterpiece in paint protection: Carlas USA. As professional detailers and PPF installers, we have always been at the forefront of vehicle protection, striving to overcome the challenges of the existing products. This dedication has led us to create a film that is not just another solution, but a true game-changer in the market.

Why is it a game changer, you ask? As a team with our combined 25 years of PPF experience, we have designed a premium product built with no compromise to the film's quality or integrity. This results in a premium quality film that is easier to apply and has much more competitive pricing. Combined that with a wide array of rapidly growing colors.

Carlas USA is your destination for advanced vehicle protection solutions. We are committed to enhancing the durability of your vehicle with proprietary, top-quality protection products. Our products are engineered differently than the rest so they offer unparalleled ease of installation while providing long-lasting protection, backed by a 10-year warranty.
