

How to Cast Mobile on TV- Javatpoint

Click on the Screen cast button show the list of Chromecast devices that are connected to your Wi-Fi network. Select one of the Chromecast devices connected to your TV. After a few seconds, you will see your Android phone's screen will display on your connected TV.

Screen mirroring is also known as [screencasting](#) and *screen sharing*, a simple way to replicate the phone, tablet, laptop, or PC screen on a TV screen. This feature can be used anywhere, including in an office setting to show presentations or watch movies on the big TV screen at home.
