Here's a step-by-step guide to setting up your AquaThruster based on the transcript from the video: ***Understand the Regulations: Before you begin, ensure you understand the . Discover how the AquaThruster™ will exceed your expectations in lakefront maintenance and aquatic weed control with its powerful and customizable design. The correct horsepower and cord length for you depends on what you're trying to accomplish. How large of an area do you want to keep clear?. Extend the life of your AquaThruster and maintain high quality performance by cleaning any debris from the motor, until you are able to see the stainless can. Build up around the can will prevent the unit from cooling down correctly. A degreaser or a pressure washer may help. Oct 4, · Check These 3 Things First: Propeller: Check to make sure you have all the blades that your unit requires. Also look for chips and grinded down blades. A good indicator of a broken prop would be excessive shaking or vibration. You may also be able to notice a dramatic difference in the performance and torque of the machine.
