

# The Celsius Network, Explained (CEL)

Celsius Network, the CEL Token and Celsius Wallet launched in 2017 and has since grown 72,000%. Learn why + get the latest promo codes by clicking [HERE](#) ↩

Celsius Network — creator of the CEL Token and [Celsius Wallet](#) launched in late 2017 during the crypto ICO craze, releasing their White paper ([available here](#)) in Q3 2017.

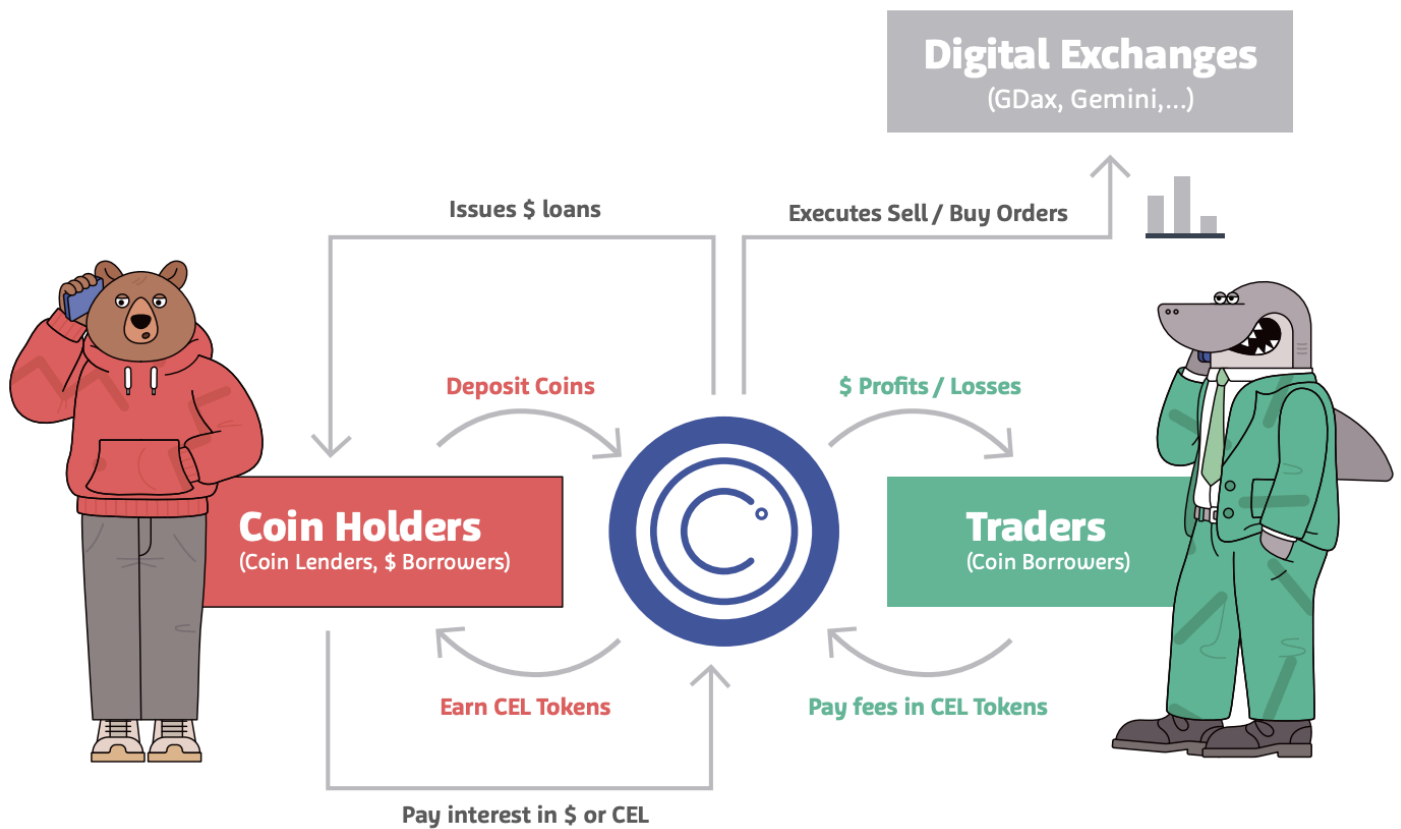

CEL token has seen an amazing run in 2020, with the token rising in value from just shy of 0.15 in January to \$4.70 as of the end of December 2020 (an increase of 33x).

During this time, they've increased assets under management to over US\$3.3b and are closing in on 97,000 members with active wallets. (as of 23 November 2020)

Celsius Network members have earned almost US\$200m in interest to their Celsius wallets over the last 12 months alone.

So with this said, just what is Celsius Network and what do they do?

## What does Celsius Network (\$CEL) do?

Said simply, Celsius Network allows members to either make money by earning interest on their cryptocurrency balances, or to borrow against their crypto collateral.

**Earning Interest** — is possible as Celsius pays depositors 80% of the profits they make through lending crypto out. Rates are far higher than traditional bank accounts because of the extremely skewed demand in the market to borrow crypto liquidity. More about the rates below.

**Crypto Collateral** — this allows depositors to borrow against their crypto, rather than selling (which can have enormous tax benefits). Loans are usually over-collateralized, enabling Celsius to maintain an appropriate risk profile and ensure borrowers don't end up having to provide too much additional collateral.

In return for your crypto collateral, Celsius offers some disruptive interest rates.

I know what you're thinking next...

## And what about those interest rates?

Well I'm glad you asked! Celsius updates their reward rates weekly, so you know in advance how much interest you'll earn on your tokens.

For example, if you deposit 1BTC, you have the choice to earn 4.74% APY in BTC, or 6.2% APY in CEL token. This means your 1BTC deposit would earn 4.74% or 6.2% over an entire year, or ~365 days.

With some rough back-of-the-napkin maths, each week you would earn interest each week of ~0.09% in BTC or ~0.12% in CEL tokens. This creates incentive for users of the Celsius Wallet to earn in CEL token, rather than "in-kind" (the deposited token, BTC, or otherwise).

# Celsius Loyalty Tiers

Now, in order to get even higher levels of interest, Celsius has loyalty levels based on the amount of CEL token within a wallet.

## Celsius Loyalty Tiers

 <b>Bronze</b>	<b>5% - 10%</b> CEL Token Holdings	<b>5%</b> Bonus rewards	<b>5%</b> Loan interest discount
 <b>Silver</b>	<b>10% - 15%</b> CEL Token Holdings	<b>10%</b> Bonus rewards	<b>10%</b> Loan interest discount
 <b>Gold</b>	<b>15% - 20%</b> CEL Token Holdings	<b>20%</b> Bonus rewards	<b>20%</b> Loan interest discount
 <b>Platinum</b>	<b>20% - 100%</b> CEL Token Holdings	<b>30%</b> Bonus rewards	<b>30%</b> Loan interest discount

If your total wallet balance is over 20% in CEL tokens, the highest rate of interest becomes available (in CEL tokens).

## CEL Token Flywheel

The Celsius Network Flywheel shows (for illustrative purposes) the method by which Celsius makes a profit while encouraging increased adoption of the Celsius wallet and further boosting the tokenomics of the CEL token using [Metcalfe's Law](#) (fundamental to growing a network).

## Who created Celsius Network and the CEL token?

Celsius is the brainchild of [Alex Mashinsky](#), a serial entrepreneur who among many other start-ups has founded;

- Arbinet (a commodity exchange for telco companies in the late 1990s)
- VoiceSmart (one of the first players in VoIP)
- Groundlink (an on-demand limo service, think Uber, but for professionals)
- Q-Wireless (who were installing free Wi-Fi across the USA)
- Celsius Network (Ethereum based lending and interest platform/wallet)

What the above shows is that Mashinsky has been at the groundbreaking of technological change during his career and Celsius is no exception. Alex has plenty of ownership interest, holding just shy of 43m CEL tokens (with a value at writing in December 2020 of nearly US\$200m).

Mashinsky does weekly Q & A sessions with the community and values teaching financial literacy to those in the Celsius Network community, something that is a passion of his to bring

more along this journey of financial freedom.

Additionally on [Twitter](#), Mashinsky offers his musings on industry trends, the competitive landscape and, of course, Celsius itself.

Now you may wonder, “So how do I join Celsius?”

Perhaps unsurprisingly, we go over that and how to get a free \$20 in BTC when you sign up! Sound good?

## How do I sign up to Celsius?

Signing up is easy, and with a deposit of US\$200 or more in tokens, Celsius throws in an additional \$20 in BTC. They also do regular promo codes for BTC every few weeks (see bottom of this article for additional promo codes).

Use my referral code [191899e040](#) when signing up to earn a bonus US\$20 in BTC when you transfer \$200 or more!
