

RABIT(Robotic Assisted Breast-axillo Insuffulation Thyroidectomy)

(Robotic Assisted Breast-axillo Insuffulation Thyroidectomy)

Scarless Robotic Thyroid Surgery

Team led by

Dr Swaminathan Sambandam Multi- Organ Transplant and Robotic Surgeon and assisted by **Dr Gauwtham Dakshinamurthy** did two RABIT procedures in a span of one week for two young girls.

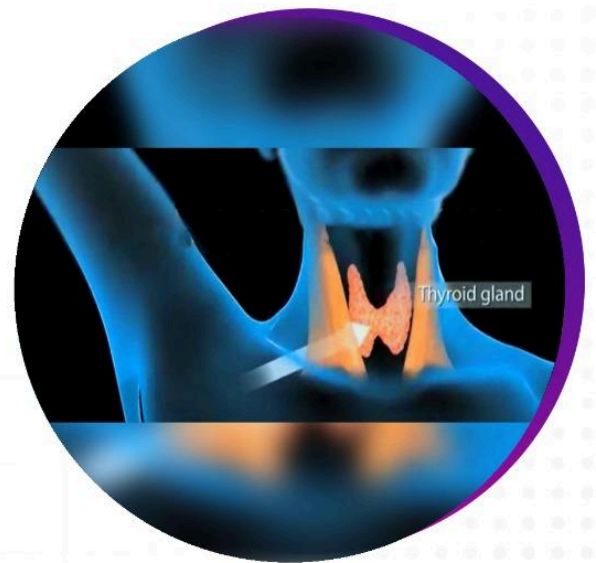

Surgery was done to remove the lump in the left & right lobe of thyroid respectively In RABIT, access to the thyroid gland is through the armpit & so the individuals will not have any visible scars on their neck.

Benefits of RABIT

Robotics gives several fold magnification enabling the surgeon to remove the thyroid precisely without damage to crucial nerves that run close to the gland.

Patient experiences no or minimal pain & quick recovery, in this case both individuals got discharged in 48 hours.

Kauvery Hospital Alwarpet
is one of the very few centres in
Tamil Nadu to perform RABIT procedure.
