

# Cold Box Inc. - Cold Storage Los Angeles | REFRIGERATED CONTAINER

Cold storage is a relatively new concept in the United States. It's an extension of the traditional warehouse in that it can be used for long-term food storage, but it has several advantages that make it more economical, efficient, and flexible than traditional methods. [Cold storage Los Angeles](#) facilities are vital for the transportation and storage of perishable goods. While there is a wide variety of [refrigerated containers](#) some services it caters to include meat processing plants, cosmetics, medical supplies, and even foods such as chocolate and wine. To receive the best price on your next need for [portable cold storage containers](#), use Cold Box Inc. Cold Storage is defined as the mechanical refrigeration of food and pharmaceuticals. Cold storage can come in two types: cold storage and class 5 cold storage. The difference between freezing and cold storage is that freezing keeps food frozen while cold storage keeps food at a temperature of 35°F or 0°C.
